Computation for Reimbursement for Automobile Travel Expenses

1. Where did the trip originate? _____
2. What was the destination? _____
3. What was the total number of miles driven on official BMW CCA Club Racing business? Include the round trip mileage plus miles driven in and around the destination on official business _____
4. Multiply the total miles from Step 3 times the current mileage rate. (\$.36 per mile) _____
5. What was the lowest, 21-day advance round trip air fare between the airports closest to your trip's origin and destination? _____
6. Cost of ground transportation at origin:
 - a. Had you driven to the the origin airport, what is the total round trip mileage between your house and the airport? _____

Multiply this times the current mileage rate. (\$.36 per mile) . _____

For the duration of this trip, what would the least expensive long-term parking have cost? _____

Add the parking and mileage figures together _____
 - b. What is the lowest ground transportation fare to and from the airport you could have obtained? (Bus, shuttle, train, car, taxi, etc.) (If by car, taxi, or airport limo service, include tip not to exceed 15%.) _____
7. Cost of ground transportation at destination:
 - a. At the destination estimate the cost of ground transportation to and from the official business location. _____
 - b. At the destination, what would the cost been for the least expensive rental car available. Include in your estimate the cost of gasoline, parking, and tolls, if any. _____
8. Add the lowest figure from either 6a or 6b with the lowest figure from either 7a or 7b. _____
9. Add the figure from Step 8 to the figure from Step 5. This should be the lowest possible cost for making this trip by air. _____
10. If you made the trip by automobile, you must use the lowest figure from Step 4 or Step 9 on the front of this form under the line "Automobile"
